DOCTORAL RESEARCH

Data Quality Matters – Detecting and Accounting for Careless Responding

In my research, I am genuinely interested in how careless responding can be modeled and addressed in intensive longitudinal data. More broadly, I am curious about questions of measurement and how methodological approaches can improve data quality. I started my PhD journey in October 2024 as an associated member of the group “Statistical Modeling in Psychology” together with Prof. Dr. Tanja Lischetzke as my supervisor.

WORK EXPERIENCE

Oct 2024 – today PhD Student in the department of Statistics and Methodology – RPTU

Feb 2024 – May 2024 „Institute of Medical Biometry and Epidemiology - Hamburg“
Tasks: data management, modeling data using mixed model survival analysis and mediation analysis

Sep 2021- Feb 2024 Methodenzentrum – RPTU
Tasks: study management

Sep 2021 – Feb 2024 „Forschungsinitiative Affektregulation“ (ARPID) - RPTU
Tasks: Managing participants for a longitudinal study with chronic and non-chronic pain participants

Apr 2021 – Sep 2021 "DFG Research Training Group Statistical Modelling in Psychology (SMiP)"
Tasks: help programming an Ambulatory Assessment study, generating participants feedback with RMarkdown

EDUCATION

2022-2024 **M.Sc. Clinical Psychology**
(1.1)
at RPTU

2019-2023 **B.Sc. Psychology (1.2)**
at RPTU

2014-2017 **Abitur**
Helmholtz-Gymnasium
Heidelberg

TEACHING EXPERIENCE

Oct 2023 – today Data analysis in R for bachelor students
Courses: “Multivariate Verfahren” and “Computergestützte Datenanalyse”

Oct 2021 – Sep 2023 Implementing and teaching of a psychology seminar regarding the topic „Psychologie der Vielfaltigkeit“
via "Studierendenkolleg – RPTU“

COMPUTER SKILLS

Office Excel, Word and PowerPoint

Statistical Softwares R/ RMarkdown

Ambulatory Assessment movisensXS, SEMA3 and M-Path

Survey Tools SoSci Survey and LimeSurvey
